SUMMARY

Analyst with a **Master's degree in Statistics and 1.5+ years of professional experience** in data validation, quality assurance, data processing, and structured review. Experienced in handling large and complex datasets, identifying missing, duplicate, inconsistent, malformed, and reconciling data against defined rules and source documents. Strong attention to detail, with experience standardizing formats, validating records, and documenting discrepancies to maintain data integrity. Proficient in MS Excel, Python, SQL, Power BI, PowerPoint, and Word, with the ability to work systematically across high-volume datasets while maintaining consistency and completeness. Experienced in following client-specific guidelines, and working independently in remote environments.

PROFESSIONAL SKILLS

- **Data Entry & Validation:** Data Entry, Data Validation, Quality Assurance, Error Detection, Accuracy Control, Record Verification
- **Statistical Analysis:** Descriptive & Inferential Statistics, Exploratory Data Analysis (EDA), Multi-step Quantitative Reasoning, Hypothesis Testing, t-Tests, ANOVA, Correlation Analysis, Regression Analysis, A/B Testing
- **Data Visualization:** Power BI, Interactive Dashboard Development, Chart & Graph Analysis, Data Visualization, KPI Reporting, Trend Analysis, Comparative Analysis, Analytical Reporting, Data Storytelling
- **Data Analysis & Programming:** Python, SQL (MySQL), Pandas, NumPy, SciPy, DAX, Power Query (M)
- **Technical Communication:** Analytical Findings, Technical Documentation, Written & Verbal Communication, Remote Collaboration
- **Statistical Analysis:** Hypothesis Testing, Correlation and Regression Analysis, ANOVA, t-test, etc.
- **Microsoft & Analytics Tools:** Microsoft Excel, Microsoft PowerPoint, Microsoft Word, Jupyter Notebook, GitHub, Replit
- **AI & Productivity Tools:** ChatGPT, Claude, Microsoft Copilot, Prompt Engineering, AI-Assisted Data Analysis

EXPERIENCE

Risk Analyst @ Xceedance

- Analyzed large and complex datasets to identify trends, patterns, anomalies, and data quality issues; performed data cleaning, preprocessing, and validation to resolve missing, duplicate, inconsistent, and invalid records and support accurate analysis.
- Transformed raw client data into structured, analysis-ready datasets using advanced Excel, Python, and SQL; developed and interpreted Power BI dashboards, charts, KPIs, and visual reports to analyze trends, identify patterns, and communicate quantitative insights.
- Applied statistical and quantitative reasoning to interpret data visualizations, time-based trends, comparisons, and relationships; collaborated with international stakeholders to clarify requirements, resolve discrepancies, and communicate clear analytical findings using Power BI, Excel, and AI-assisted workflows.

PROJECTS

Uber Ride Analytics using Python, SQL, & Power BI - [Project Link](#)

- Analyzed 150K+ ride-booking records using Python, performing data cleaning, EDA, outlier detection, correlation analysis, and statistical hypothesis testing to identify key operational and customer trends.
- Developed complex SQL queries in MySQL to analyze booking performance, revenue, vehicle types, customer behavior, payment methods, locations, and cancellation patterns.
- Built an interactive 4-page Power BI dashboard using DAX, Power Query, data modelling, calculated columns & tables, and KPI measures.

Hospital Management System Analysis using SQL - [Project Link](#)

- Generated insights on patients, doctors, appointments, medical procedures, & hospital revenue.
- Performed relational database analysis using JOINS, subqueries, CTEs and Window functions.

Amazon Sales Analysis using Excel & Power BI - [Project Link](#)

- Analyzed sales performance, customer behavior, product performance, inventory status, & revenue.
- Utilized Power Query for data transformation and created interactive dashboards and DAX measures to deliver actionable business insights through dynamic visualizations and KPIs.

ACHIEVEMENTS

- **Shining Star Award** from my current organization for rapidly mastering the workflow and consistently delivering results to clients with almost 100% accuracy.
- **Received appreciations** from Team Lead & Manager for hard work & consistency.
- **Secured 1st Rank in Bachelors** among all Mathematics students with 9.5 CGPA out of 10 CGPA.
- **One among top 3 students in Masters in Statistics** with 9.3 CGPA out of 10 CGPA.

CERTIFICATES

- Excel Dashboards for Business Analytics
- Excel Dynamic Dashboard Course
- Essentials of Data Science- Probability & Statistical Inference
- Microsoft Power BI Data Analyst
- Certificate of Participation in Data Science Program
- Personality Value Assessment Certificate
